Please first read Part 1 before advancing to Part 2. Now come with me and let us investigate Newton s physics. When physics is approached with a sane mind, then understanding physics is easy. It is the bending of physics rules that complicate Newton s physics. When Newton bends every rule in mathematics, no one in his right mind can understand physics because Newton makes physics understandable for fools only. Let us compare Newton s investigation with the physics Kepler introduced as Kepler searched the solar system for answers and not in the way Newton said Kepler s cosmic physics work but in the manner that Kepler s physics work in the solar system. An Open Letter on Gravity is a culmination of letters I wrote to academics worldwide that profess they understand Newton, but failed to answer even one statement I brought to their attention about the flaws in Newton s physics This combination of letters introduces a new vision and a new concept on cosmic physics never experienced before. Any knowledge gained from past experience would amount to zero, when you embark on this as a new cosmic insight into the Universe. You are going to venture where you have never gone before in physics. An Open Letter on Gravity Part 2 Do you think physics are for special persons with super intellectual abilities and that physics is reserved for the very brightly minded? Allow me to show how little those understand about true physics when they claim they understand Newton...
