

A Manual of Practical Solid Geometry; Adapted to the Requirements of Military Students and Draughtsmen

Filesize: 1.32 MB

Reviews

*A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).
(Matilda Hoeger V)*

A MANUAL OF PRACTICAL SOLID GEOMETRY; ADAPTED TO THE REQUIREMENTS OF MILITARY STUDENTS AND DRAUGHTSMEN

DOWNLOAD

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 Excerpt: .result is not obtained at the first graduation of the line, other trial lines from the given point must be drawn, or the first line drawn be re-graduated, and the whole process repeated till the horizontals, giving the planes of contact on each side of the line, become parallel, i.e., till the two planes, passing through the line, and therefore the point, are portions of one and the same plane surface. Note.--The number of trials depends so much on the results given by the first, that it is important to pay particular attention when graduating the assumed line for the first time to make as close an approximation to the final result desired as may be possible. Prob. XXIV. (Fig. 24).--From a given point to draw lines to touch a given irregular surface, represented by contours. From the plan of the point, and embracing that portion of the surface to which consideration is limited, draw the plans of the lines the points of contact of which with the surface have to be determined. From (p), the plan of the point, draw a line in any convenient direction, and graduate this line from (/) in a manner similar to the ground. Taking the plan of each transverse line in succession, join the points where it meets each contour with the corresponding points of the assumed line. By reasoning similar to that of Prob. XXII. it may be shown that, of all the lines of junction for each...
