

## Rhodora Volume 12

By New England Botanical Club

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 104 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 edition. Excerpt: . . . in the exact species, occurs in some of the marly bogs on the coast of the Gasp6 Peninsula, where there is a remarkable mingling of marl-swamp types with the characteristic plants of sphagnum bogs and even of brackish or saline shores. Whether in these marshes there is a rare combination of calcareous, saline, and peat-bog conditions is a matter which awaits further study. From Crystal we returned to Pembroke, spending our last week there in collecting the fruiting Blackberries and Thorns and in closing off the summers work. On the way back to Boston we were tempted by the extensive outcrops of limestone in the neighborhood of Rockland to visit that city of lime-quarries with the hope of finding interesting coastal plants. In this, however, we were not wholly satisfied, for the rock seemed very hard and the soil sterile as compared with the softer...
